Content

The *Architekturstadtplan Berlin* provides information far beyond that offered by conventional city maps.

Featuring more than 2,000 buildings, it includes almost all architecturally and historically significant buildings of Berlin. These are not limited to famous landmarks such as the *Reichstag*, the *Potsdamer Platz* or the *Jüdisches Museum* (Jewish museum), but the general plan also includes a great number of less well-known architectural masterpieces.

Discerning residents and visitors of the German capital are presented for the first time with a comprehensive overview of buildings. The index, which is divided into eras, buildings and architects, makes the map a perfect directory of the German capital and its history.

After the success of the first edition, the revised and expanded new edition was published in early July 2002 for the first time in German and English. The lid was strengthened, making the product more stable.

Authors

Peter Knoch was born in 1965. He studied Architecture at the *Hochschule der Künste* in Berlin and in St. Petersburg. He works as an architect and has been conducting architecture tours of Berlin and Potsdam since 1997.

Thomas Michael Krüger was born in 1958. He studied Architecture in Brunswick and Berlin. Today he teaches at the *Technische Universität Berlin* and works as a partner in the architecture firm Krüger-Belz-Architekten.

Marnie Schaefer studied Industrial Design in Florence and Product Design at the *Hochschule der Künste* in Berlin. Since 2000, she has been working as an independent designer in Berlin.
